*Avion can be continuously installed, forming flowing lines, seamlessly integrated via continuous connectors.  
Please enquire for further detail*

1. Avion is available with two different anti-glare screens - fins and Beta R5 and R5 mini micro.
2. For continuous installation the luminaire can be equipped with a continuous connector and is suspended on a wire pendant. Alternatively luminaires can be connected with a straightcoupling. A degree disc at the flex points allows easy adjustment of system assembly.
3. The Avion is available with e-Sense and em LED. A pull switch is also available, placed on the same side as the mains cable.
4. All Avion with indirect lighting portion are equipped with a dust cover over the light opening in the surface. This keeps the luminaire interior clean from dirt.
5. Avion has a special roll switch to significantly simplify installing and rotating the lamps.
